Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the prior arts of record fail to anticipate or render obvious the following recited features: shifting the center frequency of the wide-band signal by a small fraction epsilon of its bandwidth as recited in claims 1, 21 and 23. Correcting each cross-power spectral point of each sub-band cross-spectrum result with a sub-band scaling term, a gain differential compensation term, a band-shape correction term and a wide-band power gain term as recited in claims 9 and 17. Re-quantizing the M multi-dot N sub-band signals by re-scaling and truncating; complex mixing each of the M multi-dot N re-quantized sub-band signals; 90.degree. phase shifting one of two components of each of the complex mixed M multi-dot N sub-band signals as recited in claim 21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
